Advice for schools

CORONAVIRUS SYMPTOMS IN CHILDREN

A CHILD WHO DEVELOPS ONE OR MORE OF THE FOLLOWING SYMPTOMS SHOULD BE CONSIDERED AS A POTENTIAL CORONAVIRUS CASE:

NEW CONTINUOUS COUGH

This means coughing a lot for more than an hour, or three or more coughing episodes in 24 hours (if the child usually has a cough, it may be worse than usual)

FEVER (TEMPERATURE OF 37.8°C OR HIGHER)

The child will also feel hot to touch on their chest or back

A LOSS OR CHANGE TO SENSE OF SMELL OR TASTE

this means the child has noticed they cannot smell or taste anything, or things smell or taste different to normal.

MOST CHILDREN WITH CORONAVIRUS HAVE AT LEAST ONE OF THESE SYMPTOMS.

If a child is unwell with one or more of these specific symptoms they should be told not to come into school or sent home as soon as possible and advised to get a coronavirus test. **ONLY** those children with one or more of these symptoms or those advised by their clinician or Local Authority should get a test.

Children reporting other symptoms such as a headache, sore throat, runny or sniffling nose, earache, itchy eyes, lethargy or tiredness **WITHOUT** a fever should **NOT** be treated as potential coronavirus cases or advised to take a test.
