FAMILY FOCUSED EMPLOYMENT SUPPORT

Are you aware of any families, with an unemployed adult in the home, who would benefit from family support to overcome the general challenges that they are facing?

We know that barriers to employment come in many different forms and we need to address the wide range of issues a family may be experiencing before they can even consider their steps to employment.

We know that some families don't meet the criteria for statutory support, or have just finished a period of support, but would benefit from a little extra help.

Did you know that, in partnership with The Education People and Kent County Council, we now have a Family Focused Employment Support Service as part of the Employment Support Hub for Canterbury and Thanet? Through this, Salus are able to work with whole families to address wide ranging issues that they may be facing. This could include debt management, housing, mental health, managing boundaries or any other challenge that arises for a family.

If you know a family that would benefit from this service, please complete the referral form and return to info@salusgroup.org.uk If you would like some more information, please contact:
Emma Mead, Service Manager, on 07725 629789.
